ZHT-AC485T

Air Condition Remote Controller

Features

· Can learn the Air-Condition(A/C) remote controller infrared codes(accompanied with an IR sender)
· Compatible with various Air Conditioners
· Detect air conditioner status, support A/C failure alarm
· Support switch signal input detection
· Support air conditioner power control
· Support built-in temperature sensor data acquisition
· Support an external temperature probe and a current sensor

Technical Specification

Output	RS485
Protocol	Modbus
Baud Rate	2400~115200 bps
Infrared Rate	Receive: 37~39KHz, Send: 38KHz
Alarm Output	1 N.O./N.C. DO
Working Temperature	-20℃~+50℃
Working Humidty	5~95%RH
Power Supply	DC12V, 0.4A
Range of Voltage	DC7~17V
Power Consumption	≤2W
Dimension(L×W×H)	130mm×90mm×32mm

Installation Guide
