

# DH-IPC-MFW7449Y-Z7-T44

4+4MP Dual-Sight Polarlight Bullet WizMind Network Camera

Launched by Dahua Technology, Dahua WizMind is a full portfolio of solutions composed of project-oriented products including IPC, IVSS, NVR, PTZ, XVR, Thermal and software platform which adopts industry-leading deep learning algorithms. Focusing on customer's requirements, WizMind provides precise, reliable and comprehensive Al solutions for verticals.

#### **Series Overview**

Equipped with built-in GPU chip and dual micro PTZ, the camera can monitor panorama and details at the same time. The angles and focus length of the two lenses can be adjusted separately and remotely, which is easy for installation. With hyper DoF technology, the camera has clear image in the foreground and background. Adopting deep learning algorithm, the camera supports various functions such as perimeter protection, crowd density, face recognition, and video metadata, and more than one functions can be enabled at the same time. It is applicable to arterials, streets, alley, and entrance/exit, and more.

#### **Functions**

# **Time-Division Exposure**

Time-Division Exposure technology ensures that when the device is taking multiple snapshots of more than one targets, the quality of the snapshots will not be affected. It can also be used to adjust the brightness, speed and more of targets, to produce high quality snapshots. It is widely used in scenes that have pedestrians and vehicles, and captures clear images of faces and license plates.

#### **Dual Visual Angle**

With the technology of Dual Visual Angle, the camera can monitor two separate scenes at the same time.

#### **Dual Micro-PTZ**

With the Dual Micro-PTZ technology, the angles of the two lenses can be adjusted physically and remotely, which is easy for installation.

#### **Hyper DoF**

With Hyper DoF technology, DoF and iris of the camera can be adjusted separately. With the largest iris, the camera can display the image of large DoF.

- 2 lenses and 2 channels are integrated into the design.
- · Adopts advanced technologies such as Hyper DoF, Illumination by Area, to achieve full coverage of different speed targets with a larger DoF distance under low illumination.
- · Flexible remote debugging through the Dual-micro PTZ.
- Dual channels: 4-MP 1/1.8" CMOS image sensors, low luminance, and high definition image.
- Outputs max. 4 MP (2688 × 1520)@25/30fps.
- Built-in efficient illuminator of dual light fusion, and the max. illumination distance is 150 m.
- ROI, SMART H.264+/H.265+, flexible coding, applicable to various bandwidth and storage environments.
- · Multiple intelligent resources switchable.
- · Channel 1: IVS, Face recognition, Face detection and Video metadata,
- · Channel 2: IVS, Face recognition, Face detection, Video metadata, Crowd distribution map and People counting.
- Intelligent functions of Channel 1 and Channel 2 can be enabled at the same time.
- Hyper DoF technology: DoF and iris of the camera can be adjusted separately. With the largest iris, the camera can display the image of
- · Time-Division Exposure that when the device is taking multiple snapshots of more than one targets, the quality of the snapshots will not be affected. It can also be used to adjust the brightness, speed and more of targets, to produce high quality snapshots.
- · Alarm: 7 in, 3 out; audio: 2 in, 1 out; 485; BNC; supports max. 256 G
- 12 VDC power supply, easy for installation.
- · IP67 protection.

# **Dual Light Fusion**

Dahua Dual Light Fusion technology integrates the light sources of different waves. With good illumination, it meanwhile can minimize the light pollution to avoid dazzle problem. The camera provides multiple illumination solutions to satisfy different demands.

# Illumination by Area

This technology allows you to independently control the lighting in multiple areas of the image, enabling the device to easily adapt to different scenes, save power and perform more efficiently.

#### **Cyber Security**

Dahua network cameras employ a series of security technologies, including security authentication and authorization, access control protocols, trusted protection, encrypted transmission and encrypted storage. These technologies improve the camera's defense against external cyber threats and prevent malicious programs from compromising the device.

| Technical Specification    | on  |  |  |
|----------------------------|---|--|--|
| Camera                     |   |  |  |

| IVS          |                | Abandoned object; missing object   |                      |   |                     |
| Intelligen   | Intelligence   |  |                      |   |                     |
| IVS (Perimet | er Protection) | Intrusion, tripwire, fast moving (the three functions support the classification and accurate detection of vehicle and human); loitering detection, people gathering, and parking detection  |                      |   |                     |
| Face Detecti | on             | Face detection; track; snapshot; snapshot optimization optimal face snapshot upload; face enhancement; face exposure; face attributes extraction including 6 attribu (gender, age, glasses, expressions, mask, and beard) ar 8 expressions (angry, sad, disgusted, scared, surprised, calm, happy, confused); face snapshot set as face or one-inch photo; snapshot strategies (real-time snapshot uality priority and optimization snapshot); face angle filter; optimization time setting. |                      | ement; face<br>ng 6 attributes<br>nd beard) and<br>d, surprised,<br>as face or<br>ime snapshot, |                     |

|                        | gathering, and parking detection   |
|------------------------|--|
| Face Detection         | Face detection; track; snapshot; snapshot optimization; optimal face snapshot upload; face enhancement; face exposure; face attributes extraction including 6 attributes (gender, age, glasses, expressions, mask, and beard) and 8 expressions (angry, sad, disgusted, scared, surprised, calm, happy, confused); face snapshot set as face or one-inch photo; snapshot strategies (real-time snapshot, quality priority and optimization snapshot); face angle filter; optimization time setting.  |
| Face Recognition       | Face detection; track; snapshot; snapshot optimization; optimal face snapshot upload; face enhancement; face exposure; face attributes extraction including 6 attributes (gender, age, glasses, expressions, mask, and beard) and 8 expressions (angry, sad, disgusted, scared, surprised, calm, happy, confused); face snapshot set as face or one-inch photo; snapshot strategies (recognition priority and optimization snapshot); face angle filter; optimization time setting.  Supports adding 5 group face databases; registering person one by one or in batches; setting face similarity; and supports face comparison with the face database containing up to 100,000 face pictures. |
| People Counting        | Tripwire people counting and people counting in area, generating and exporting report (day/month/year); queue management, generating and exporting report (day/month); 4 rules can be set for tripwire, people counting in area and queue management   |
| Crowd Distribution Map | Crowd distribution map; global people counting; people counting in area  |
| Video Metadata         | Motor vehicle, non-motor vehicle, face, human body detection; track; snapshot; snapshot optimization; optimal face snapshot upload.  Motor vehicle attributes: license plate, vehicle type, vehicle color, vehicle logo and other attributes: seatbelt, smoking, calling.  Non-motor vehicle attributes: type, color, number of people, top type and color, hat.  Human body attributes: gender, top/bottom type and color, bag, hat and umbrella. Face attributes: gender, age, expressions, glasses, face mask and beard.  |
| Smart Search           | Work together with Smart NVR to perform refine intelligent search, event extraction and merging to event videos  |
|                        |  |

| Video                       |   | Alarm                 |  |
