## DH-PFM885-I

## Dimension (mm)

## Application Scenarios

- The special scene: the elevator IP wireless HD video monitoring.

Note: PFM885-I is a 2.4 GHz wireless device, there are only 3 wireless channels $(1 / 6 / 11)$ which won't interfere with each other. It's recommended to use $\leq 3$ * PFM885-I in an elevator shaft. Please use 5GHz wireless bridge such as PFWB5-30n if you have more than 3 elevators in a single elevator shaft.

## Network Mode

DH-PFM885-I contain two wireless device, one is set as access point, the other one is set as client point, for point-to-point communication, as demonstrated below.
