Integrated Solar Monitoring System(without Lithium Battery)

#### System Overview

Integrated solar monitoring system (without lithium battery), all in one desion, using 4G to transfer monitoring data and solar to power, which is easy/quick to install and can save wiring to the greatest extent, includes three parts: 4G network camera, integrated solar power system and camera's mounting bracket, which is more convenient for sale, order and transportation.

The integrated solar power system, integrating solar panels, maximum power point tracking (MPPT) charging controller and mounting brackets, provides stable power supply for the front-end data acquisition system—4G network camera through high conversion charging device. It is compact, portable, easy to install, disassemble and maintain compared with conventional system.

The 4G supported IR bullet camera delivers 2MP resolution with a 3.6 mm or 6 mm fixed lens. The camera can be connected to mobile internet as long as you have a SIM card, provides an excellent choice for a variety of small to mid-size applications such as off-grid system, farms, forest, border. Wall mount bracket of camera, support multi-angle flexible adjustment.

#### Functions

#### Integrated Aluminum Die Casting Casing

Compact structure integrated with solar panel, lithium battery pack and charging controller to improve the appearance, installation, and maintenance of the System.

#### Monocrystalline Solar Panel

Adopts monocrystalline solar panel to greatly improve optical absorbance efficiency and power generation performance with dusky light.

#### **Remote Monitoring with APP**

With Dahua cameras, it supports real-time remote monitoring of the system operation status and alarm prompts of battery with APP.

#### Solar Power System

- Integrated die casting casing
- Monocrystalline solar panel
- Aluminum alloy frame
- Remote monitoring with APP
- Maximum Power Point Tracking (MPPT) charging controller
- RS-485 communication function
- Electronic protection

#### 4G Network Camera

- 1/2.9" 2Megapixel progressive CMOS
- H.265 & H.264 dual-stream encoding
- ·25/30 fps@2M (1920×1080)
- Day/Night (ICR), 3DNR, AWB, AGC, BLC
- Multiple network monitoring: Web viewer, CMS (DSS/PSS) & DMSS
- Micro SD card slot, up to 256 GB
- 3.6 mm, 6 mm fixed lens
- Max. IR LEDs length 40 m
- 4G supported
- IP67

#### Maximum Power Point Tracking Charging Controller (MPPT)

MPPT controller helps significantly improve the energy utilization efficiency of the System, and raise the charging efficiency by 10%–30% compared with conventional PWM controller.

#### RS-485 Port

RS-485 port and standard Modbus protocol, meeting communication requirements in various scenarios.

#### **Electronic Protection**

Comprehensive electronic protection: Current limiting, short circuit, and reverse current protection of solar panel; reverse connection, overvoltage, over-discharge, and over-temperature protection of lithium battery; overload and short circuit protection of load.

#### 4G

The camera can be connected to Mobile Internet as long as you have a SIM card, then you can place it anywhere and no need to worry about the wiring hassles.

#### Intelligent Video Analysis (IVS)

Dahua camera is equipped with a built-in intelligent analytic algorithm based on video, which can realize intelligent functions like Tripwire and Intrusion, to quickly and accurately respond to monitoring events in specific area, It can enhance monitoring efficiency. In addition, the camera supports intelligent tamper detection, which is to generate warning message via detecting dramatic scene change and to guarantee effective video surveillance.

#### Smart IR Technology

With IR illumination, detailed images can be captured in low light or total darkness. The camera's Smart IR technology adjusts the intensity of camera's infrared LEDs to compensate the distance of an object. Smart IR technology prevents IR LEDs from whitening out images as they come closer to the camera. The camera's integrated infrared illumination provides high performance in extreme low-light environments up to 80 m (262.5 ft).

#### Protection (IP67, Wide Voltage)

The camera allows for ±25% input voltage tolerance, suitable for the most unstable conditions for outdoor applications. Its 2KV lightning rating provides effective protection for both the camera and its structure against lightning. Subjected and certified to rigorous dust and immersion tests (IP67), the camera is the choice for installation in even the most unforgiving environments.

#### Environmental

Dahua cameras operate in extreme temperature environments, rated for use in temperatures from-30° C to +60° C ( $-22^{\circ}$  F to +140° F) with 95% humidity.

#### Smart Codec (H.265+ & H.264+)

Smart Codec is the optimized implementation of standard video compression (H.265 & H.264) that uses a scene-adaptive encoding strategy, dynamic GOP, dynamic ROI, flexible multi-frame reference structure and intelligent noise reduction to deliver high-quality video without straining the network. Smart Codec technology reduces bit rate and storage requirements by up to 70% when compared to the standard video compression.

#### **Technical Specification**

Integrated Solar Power System (without Lithium Battery)

Model	DH-PFM364L-D1
Solar Panel	
Туре	Monocrystalline silicon
Max. Power	60W
Solar Cell Efficiency	21%
Max. Mechanical Load	5400Pa
Protection	
Over-discharge Protection Voltage	11.1V DC
Low Temperature Charging	≤-10°C (14°F)
Low Temperature Discharging	≤-20°C (-4°F)
Grade	IP66
Others	Over temperature, overvoltage of the battery, overload, and short circuit
