

Dahua DeepHub Device Management System

Overview

Dahua DeepHub Device Management System (DMS) is mainly designed for managing smart interactive whiteboards and to meet the extensive needs of meeting rooms, offices, classrooms and other scenes. Through DMS, users can know the status of the smart interactive whiteboards, schedule meetings, upgrade the system, etc., helping them to manage and maintain the equipment and bringing an excellent user experience.

Functions

1. Provide whiteboard use information, define and apply usage policies. view status/information and remotely upgrade/control the whiteboard (restart, wake up, sleep, take screenshots, etc.).

2. Schedule meetings, edit minutes, upload attachments, add and notify participants through email.

3. Generate meeting reports and whiteboard status based on preferred dates.

4. Add, edit, or delete groups. Users can be divided into different groups for easier management.

5. Add, edit, or delete roles. Granted permissions are based on the role of the user. Thus, different users can have different permissions, fifferent user profiles and hierarchies can be established.

6. Add, edit, or delete users. After logging in to DMS, users can manage and use interactive whiteboards individually, in groups of pannels, or as a whole.

7. Manage log records of users and whiteboards.

8. Add, edit, or delete management of groups, roles, users and configure service parameters.

9. Send real-time or scheduled push notifications to smart interactive whiteboards, such as emergency alert, etc.
