

Dahua DeepHub Board

Educational Software Series

DeepHub Board

Location A

Location B

■ Introduction

Dahua DeepHub Board is a whiteboard software that performs online collaboration. Designed with inclusiveness and creativity in mind, the software innovatively allows you to organize and share information. It is also a lightweight software that supports various writing features, which improves work efficiency. This new software not only reduces the cost of collaboration, but also breaks down the barriers between different members of an organization to both empower the organization and individual.

■ Features

Creativity and Inspiration

Take your inspiration and mold it into concrete ideas with brushes, notes, images, documents and hyperlinks.

Exploration and Brainstorming

Freely select from a variety of rich templates to suit your scene, as you bring your creativity to the whiteboard. You can also organize brainstorming to engage in fruitful discussions.

Research and Organization

Save your documents and projects to the storage card, and conveniently manage them through the Kanban. You can also complete the creative process, from inspiration to creation, on one canvas while saving and managing your information.

Review and Feedback

Choose from a variety of styles, graphics and visuals with your team during meetings and online collaborations, to make communication easier and more interactive for members to provide their feedback and reach agreements.

Event Planning and Interactive Presentations

Team members can share information on their schedules at any time through the software. Interactive presentation mode and many other collaborative and interactive tools can also be used by presenters and meeting attendees to express their ideas with greater clarity and creativity.

■ Functions

Resource Tool	Local Image	Insert local images.
	Image Search	Insert images obtained from search.
	YouTube Videos	Insert YouTube videos through search.
	Insert Links	Insert hyperlinks.
	Vectograph	Insert common vectograph.
	Template Library	Use the templates in the template library for custom projects.
Shape Tool	Shape Type	Multiple shapes are optional.
	Shape Category	Hand-drawn shapes are recognized as standard shapes.
	Fill	Use fill colors.
